

# Uptime Kuma in Docker v1.0 2024-11-20

## Uptime Kuma is an easy-to-use self-hosted monitoring tool

Uptime Kuma site: <https://uptime.kuma.pet>

Uptime Kuma repository: <https://github.com/louislam/uptime-kuma>

Uptime Kuma in Docker repository: <https://github.com/GSCloud/kuma>

## Usage

Run **make**:

- **install** - install containers
- **start** - start containers
- **stop** - stop containers
- **test** - test containers
- **kill** - kill containers
- **remove** - remove containers
- **backup** - backup database
- **restore** - restore database
- **exec** - run shell inside container
- **exec run**=<command> - run <command> inside container
- **debug** - install containers, run interactively
- **config** - display Docker compose configuration
- **logs** - display logs
- **purge** - delete persistent data
- **docs** - transpile documentation into PDF

URL: <http://localhost:3001>

Copy **.env-dist** to **.env** and modify the file according to your needs.

## Examples

- **make purge install** - purge everything and fresh install
- **make backup test** - make backup and test functionality
- **make purge restore** - purge everything and restore from backup
- **make logs** - show logs from the main container

- `make test` - test containers (reinstall if it failes)
